

TCcommunications

deployable bandwidth by air, land & sea

Rentals

There are times when you need urgent satellite communications links for a short period only and cannot justify purchasing the required units. In times like these, TC Rentals is your communications lifeline.

We have a range of satellite communications rental equipment which will keep you connected - no matter where you are or what the situation. We can dispatch this equipment - charged up, tested and packed - to your choice of location. We have even met rental clients at the airport in situations when time has been of the essence. Our equipment is supported by a 24/7 Engineering level Help Desk and Airtime Department and comes complete with handy hints and checklists for ease of use. From satellite phones to a complete deployable remote office (with phone, fax, email, EFTPOS) and anything in between, TC Rentals is your one-stop satcom shop.

Benefits of hiring TC's Satcoms equipment

- Specialist airtime department that can provide any level of assistance;
- 24/7 engineering level help desk for service and support;
- As a one stop satcoms shop – TC can provide design services, hardware, training and ongoing airtime and bandwidth;
- As TC is the biggest ISP (Inmarsat Service Provider's) in Australasia we provide exceptional airtime rates.

The Rental Package

TC's rentals are provided with all the accessories and information required to make using our satellite equipment as easy and user friendly as possible.

The rentals packages include:

- The Satcoms terminal and accessories (phone charger, cables)
- Black canvas carry bag
- SIM Card connected to TC airtime
- How to make a Satcom Call helpful hints sheet
- User Manual
- A check list of equipment supplied

Joel Coleman, surf photographer from Saltmotion a website/gallery/surf tour service which travels the world in search of the perfect wave regularly rents equipment from TC Communications

Kathleen Hiser - Rental Manager

TC's rental department is managed by Kathleen Hiser who is very customer focused with many years of experience in co-ordinating activities, orders and making sure that the finer details are never forgotten. We like to say that Kathleen is the miracle worker with many a tight deadline met, She will try very hard to pull that rabbit out of the hat for you too!

So contact Kathleen and have a chat to her about your satellite rental requirements.

The Rental Fleet

IsatPhone Pro

Designed for anyone, anywhere

IsatPhonePRO offers satellite telephony with Bluetooth for hands free use, voicemail, text and email messaging. The IsatPhonePRO is an easy to use handheld phone which provides peace of mind when you are many kilometres from anywhere, it has the longest battery life with up to 100hours standby time, GPS location data can be looked up or sent in a text message to keep track of where you are for safety purposes.

The IsatPhonePRO is an essential part of any traveller's kit. Whether you are travelling for business or pleasure it is small enough to have on hand for a call back home to the family or for the professional users in government, media, aid, oil and gas, mining and construction sectors – to ensure that your employees conditions comply with OH&S obligations towards your employees.

Purpose built

IsatPhonePRO has been optimised to deliver the best performance over the world's most advanced mobile satellite network. It is available on a global basis over the three Inmarsat-4 satellites, which have an operational lifetime well into the 2020s.

BGAN Terminals

For beginners and specialists alike

All our BGAN terminals take into account ease of use for office mobility. They are highly customisable, boasts a plug and play capability and gives you simplicity, functionality and versatility.

Huge coverage from tiny terminals –with BGAN

BGAN is short for Broadband Global Area Network and is the voice and broadband data mobile communications service covering the planet by means of the Inmarsat satellites. BGAN is Inmarsat's newest, most advanced offering for providing satellite communication services to ship owners, business people, TV broadcasters, aid workers, governments, resource companies and any body else who needs worldwide communication. BGAN offers the fastest available data rates with a coverage greatly surpassing that of even the leading cellular networks. Additionally, BGAN airtime prices are often lower than those of standard cellular roaming.

FBB 250 Flyaway Case

Rapid Deployment

TC Communications FBB 250 Flyaway Case is the perfect solution when you need an instantly deployable broadband solution at sea. This do-it-yourself kit contains everything you need to install a Sailor Fleet Broadband 250 on your vessel - all contained within an airline checkable 32kg packing case.

Fleet Broadband provides a cost-effective, fast, reliable and easy to use "always on" solution for emails, internet, corporate network and voice services. The FBB 250 has data speeds up to 284 kbps and a diameter less than 30cm, with the dome weighing less than 5kg.

RBN VSAT Trailer

Complete Instant Remote Office

TC's RBN VSAT is your answer to providing just what you need to ensure that you receive your time-critical data efficiently and to ensure that your employees conditions comply with OH&S obligations.

- The RBN includes TC's SatPBX, which provides you with a full remote office capability including up to 40 Voice lines and 50 extensions, fax, EFTPOS and broadband data connectivity.
- TC's RBN VSAT solutions are available in a range of packages on a standard portable trailer-mounted system. TC has three pre-engineered solutions available with a 1.2 meter dish. However if these do not suit your requirements then we can design the right one specifically for you!
- These packages are limited to mainland Australian.
